

# Fiberglass

## High Temperature Fabric

### General Description:

Our high temperature fiberglass fabric is a specialized plain weave fiberglass. It's a powerful fabric designed to withstand high heat while still maintaining excellent fabric strength. The fabric has a light coating of acrylic specifically for fabric stabilization and raveling reduction.

### Physical Properties:

**Color:** Natural/Tan

**Weight:** 18.0 oz/sq. yd.  $\pm$  10%

**Thickness:** .028 inches  $\pm$  10%

**Tensile Strength:**

**Warp:** 300lbs./inch

**Fill:** 150lbs./inch

**Count:**

**Warp:** 20 ends/inch

**Fill:** 14 ends/inch

**Temperature Resistance:** 1000°F
